

# Solar panel for home British Indian Ocean Territory

What is a bifacial solar panel - PV module?

Experience superior energy efficiency and reliability with our Bifacial Solar Panel - PV Module, tailored for both residential and commercial applications. The Panels are designed with state-of-the-art Bifacial monocrystalline Silicon cells and PERC technology, hence giving maximum capture of energy from the sun even in varying conditions.

Do solar panels save energy?

Homes with the installed rely less on the grid by capturing free power directly from the sun. Homeowners can take control and offset their power usage with solar panels and reduce their electric bills.

Could floating solar power boost UK energy security?

Using just 2.3% of the total area of Europe's hydropower reservoirs for floating solar installations could produce 42.3TWh of power each year. Given that the UK has around 570 reservoirs (although not all of these produce hydropower), floating solar installations could provide a significant boost to UK energy security.

Why should you choose bifacial solar panels?

Whether you are a residential customer looking to drive down energy bills or a commercial company looking to drive down sustainability goals, our Bifacial Solar Panels will raise overall efficiency and versatility exponentially.

Are floatovoltaic solar projects taking off in the UK?

However, the UK has seen few floating solar projects take off, despite the potential they hold. There are precious few floatovoltaic installations operating in the UK at present.

When will global floating solar projects reach 6GW?

The number and capacity of these projects has been rising; analysis from consultancy firm Wood Mackenzie estimates that global floating solar capacity will cross the 6GW threshold as soon as 2031, the Asia-Pacific market having already hit approximately 3GW of floating solar projects in 2022.
