

Solar panel price for project Liberia

How many MW does easy solar have in Liberia?

Since establishing operations in Liberia in 2018, Easy Solar has installed 0.63 MW in solar capacity and established over 7,000 energy service subscriptions, providing approximately 50,000 people with energy access in Liberia.

What is the cost of electricity in Liberia?

The tariff on generator usage in Liberia is estimated to be approximately US\$3.96/kWh, which is around 14 times higher than the LEC tariff, according to Options for Development of Liberia's Energy Sector. The document also mentions that the consumption of thermal energy in the form of charcoal and firewood costs Liberia about 960,000 trees per year.

How many people in Liberia have access to electricity?

Fewer than 1% of rural Liberians have access to electricity. LIB Solar focuses on providing reliable, safe electricity to these communities by mobilizing communities instead of selling to individual customers. Each community receives high-quality solar systems that provide lighting and phone charging.

What is the sustainable power source in Liberia?

In Liberia, sustainable power is harnessed from tight-knit communities to provide life-changing products and services, starting with access to solar electricity. Electricity creates opportunities -- opportunities to learn, communicate, start a business, and build a better life.

Why is electricity important in Liberia?

Electricity is important in Liberia because it creates opportunities, such as learning, communication, starting a business, and building a better life. Unfortunately, less than 1% of rural Liberians have access to electricity. However, reliable, safe electricity is now affordable for nearly anyone. LIB Solar focuses on mobilizing communities instead of selling to individual customers to achieve economies of scale.

How will a financed project help Liberia?

The financed project will help to improve the affordability of off-grid energy products in Liberia and in the long term support higher standards of education, increase gender equality and create new employment opportunities in the country through productive use of electricity.
