

Solar panel registration Jersey

How does a solar project work in New Jersey?

Once the solar project is interconnected with the electric distribution system in New Jersey and is authorized to be energized by the EDC, the system is able to produce electricity and is eligible to begin earning SRECs. One SREC is earned each time a project generates 1,000 kilowatt-hours (kWh) of electricity.

What are the requirements for a community solar project in New Jersey?

Solar facilities must be connected to a distribution or transmission system owned or operated by a New Jersey public utility. All community solar projects must reach permission to operate on or before the expiration date noted in the CSEP acceptance letter.

How do I get a solar energy certificate?

In order to be eligible to generate Solar Renewable Energy Certificates (SRECs), solar project owners must enroll in the SREC Registration Program (SRP) to establish the project's eligibility. More detailed requirements regarding the SRP can be found in the SRP Program Guide.

What happens after registering a solar project?

Once the registration is accepted, the registrant, site host contact, system owner, and contractor/solar developer will receive an SRP acceptance letter. This letter will certify that the project, as proposed, will be eligible to generate SRECs in accordance with the State's RPS rules.

Why is solar important in Jersey?

Solar is a vital component of modern homes in Jersey, contributing to the state's renewable energy and energy management. For those focused on the bottom line, solar serves as a safeguard against rising grid electricity costs.

How many meter registrations do I need for a solar project?

Participants may submit one registration for each utility meter that will connect to a solar project. For large projects, if the project will be installed in phases, submit one registration for each phase of the project.
