Is it time to install solar panels in the Manx?

Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity). There is something very satisfying about receiving an energy bill from Manx Utilities which is not only zero, they might pay you because of excess energy sold to the grid. There has never been a better time to install solar.

How reliable are solar panels?

Solar panels convert the light from the sun into electricity, with no moving parts they are very reliable a 30 year life is realistic, that means with payback averaged at 9 years, you can have 21 years of free electricity! Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity).

Ideally tilt fixed solar panels 45°; South in Isle Of Man, Isle Of Man. To maximize your solar PV system's energy output in Isle Of Man, Isle Of Man (Lat/Long 54.23, -4.57) throughout the year, you should tilt your panels at an angle of 45°; South for fixed panel installations.

Cost - Solar PV panels can be quite expensive to buy initially. Space - Solar PV panels do take up quite a lot of roof space compared to solar thermal systems. Wasted energy - These panels produce a good amount of energy, however they have no way of storing excess power. Unless you buy a solar battery, this extra energy will be wasted.

Proposals for the very first utility-scale solar farm on the Isle of Man have been released by designer Peel Cubico Renewables (PCR). The 26MW Billown Solar Farm in Malew, near Castletown, would certainly produce enough power to fulfill more than 5% of the Isle of Man's power demand, when functional in 2024.
