

# Solar panels don't make money

Can solar panels save you money?

If your state has robust net metering or you have high energy costs, your solar panels could start saving you money in (relatively) short order. If you aren't planning on moving for many years or have reason to believe the short-term energy savings and the boost to your home's value will recoup your investment, solar could pay off.

Can you make money with solar panels?

It's simple: as the industry's potential grows and, accordingly, the company you invest in, you will make money with solar panels. Before investing in a company, it's wise to do some initial research. Look at financial indicators, assess market potential, and consider how clear and relevant the company's strategy is. 2.

Are solar panels worth it?

Solar panels are also a great source of clean energy. According to Columbia University, solar panels lower carbon emissions per acre than trees! Solar panels also reduce reliance on fossil fuels and help you live more sustainably. With solar, you can go green and keep the green in your wallet -- sounds worth it to us! Are solar batteries worth it?

Is going solar worth it?

If you don't have high energy costs or your state makes it harder to go solar, it might not be worth it financially. Even after weighing all the pros and cons, the decision to go solar is a highly personal one.

Are solar panels a good investment?

Solar panels can save you money on your electricity bills, and they typically pay for themselves in 10 years or less. Solar panels can even increase home value by an average of 6.8%! Solar panels are best for people who live in good solar states with solar-friendly policies, like net metering and solar incentive programs.
