

The Cook Islands Reed-Warbler (*Acrocephalus kerearako*) was not sighted or heard during either of the site surveys. The Cook Islands Reed-Warbler is listed as moderately threatened on the CIBD and Near Threatened on the IUCN Red List. 4. Conclusion and Recommendations

Renewable energy in the Cook Islands is primarily provided by solar energy and biomass. Since 2011 the Cook Islands has embarked on a programme of renewable energy development to improve its energy security and reduce greenhouse gas emissions, with an initial goal of reaching 50% renewable electricity by 2015, and 100% by 2020. The programme has been assisted by ...
