

Solar photovoltaic panels stolen

Can solar panels be stolen?

The likelihood of theft also tends to increase as the value and popularity of solar panels grow, with thieves looking to sell stolen solar panels on the secondary market. Additionally, construction sites where solar panels have not yet been fully installed and secured can be particularly vulnerable to theft. That then begs the question...

How do I recover stolen solar panels?

Another effective way to recover stolen solar panels is to make your panels easy to track. GPS tracking devices are used in many industries to prevent theft, most notably in motor vehicles. GPS tracking technology is extremely accurate and has been found to be an extremely effective way to recover stolen solar panels.

Can solar panels be stolen without an inverter?

This is a technology that connects the photovoltaic panels to the inverter. You need to access the inverter to enjoy the sun's energy digitally. What this means is that if the solar panels get stolen without the inverter, the perpetrators will be unable to use them. Finally, you can glue or weld the solar panels to the surface of your roof.

Can a PV module be stolen?

There are also two other key factors that affect the potential for PV module theft: PV systems have experienced dramatic growth all over the world - from inner cities to rural villages. A stolen PV module has value in resale dollars and also as a source of power for small appliances.

Are solar panels insured under homeowners' insurance?

Your solar panels may be insured under the homeowners' insurance policy; that can protect your investment and secure your mind from this pandemic. Solar panels can be stolen, and the rampancy at which it occurs is alarming. However, the smart and prepared solar PV system owner can deter attempts from thieves.

Are solar panels a target for thieves?

While it is not extremely common, solar panels can indeed be a target for thieves. This is especially true in more remote or isolated areas where surveillance is minimal and the solar panels can be removed with less risk of being caught.
