

Solar power costs in Melbourne

How much do solar panels cost in Melbourne?

According to Solar Choice, solar panels of sizes ranging from 3kW to 10kW can set you back \$4,030 to \$8,440 on average in Melbourne. Premium solar panel systems with better quality and service will cost you more. The brand and quality of hardware, the installer's rates and the rebates will influence the price you pay for a solar system.

How much does a 6.6kW solar panel cost in Melbourne?

Based on our data from July 2023, the average cost of a common 6.6kW solar panel system in Melbourne is \$6,030 including the STC rebate and GST but excluding the state rebate. So if you are eligible for the Solar Victoria rebate of \$1,400 your costs could be even lower!

How many solar panels do I need in Melbourne?

The ideal solar system size depends on your household energy needs. For an average home in Melbourne, a 5kW to 6.6kW system is typically sufficient, requiring around 16-20 panels. Larger homes or higher energy users might benefit from a 10kW system. What rebates are available for solar panels in Melbourne?

How much does a solar system cost in Victoria?

A small system (3kW and under) should usually cost no more than \$4,000, while systems that are 10kW or larger can cost in excess of \$9,000. The following table shows typical solar installation costs in Victoria compared to the national average. Keep in mind that these prices do not account for certain state solar rebates (discussed below).

How much does a home battery cost in Melbourne?

A home battery is an optional addition that you can consider depending on your budget. According to Solar Choice, solar panels of sizes ranging from 3kW to 10kW can set you back \$4,030 to \$8,440 on average in Melbourne. Premium solar panel systems with better quality and service will cost you more.

How much power does a solar system produce in Melbourne?

Melbourne receives one of the highest sunlight intensities in Australia. This translates to a high power output compared to other cities. On average, a 6kW solar system generates around 24.5kWh daily, which is enough to run a home. However, several factors affect the efficiency of a solar panel and hence, its output.
