How do I choose a portable solar generator?

Since solar generators rely on the sun, you'll get the best charge quality during sunny days. As with any generator, you need to make sure the portable solar generator system you purchase will give you the power you need. There are several measurements that'll help.

What can a solar powered generator charge?

These generators can charge power tools in the shop, laptops for remote work, and personal devices like bluetooth headphones and speakers. A solar-powered generator with a higher power capacity can even power household appliances in the event of a power outage.

What kind of batteries do solar power generators use?

Batteries used in solar power generator setups can be lithium-ion but are also often made with lead-acid technology. Both technologies can often be combined with other battery units through "chaining," - meaning you can add extra batteries onto your generator system for more robust storage capacity.

Can a portable solar power generator power multiple devices simultaneously?

A portable solar power generator doesn't offer the output of most fuel-powered generators, so it may not be able to power as many devices simultaneously. It also may not be able to provide power to appliances or devices that draw a lot of electricity.

What can you do with a solar generator?

**Backyard Parties:** Use a solar generator to liven up outdoor areas for social gatherings. A generator can give power to a stereo system and a TV or movie projector for fun nighttime viewing under the skies. **Worksites:** When working at a job site without electricity, you can use a portable generator to power tools, lights and more.

What is a solar powered generator?

Solar-powered generators--also called portable power stations--are a growing sector of the power market. I started using these a few years ago and was thrilled with having a clean, efficient charging system that doesn't roar or burn through gas.
