

Can hybrid wind and solar energy resources be used to plan electricity trade?

The proposed decision model is employed to plan electricity trade considering hybrid wind and solar energy resources. Furthermore, the effectiveness of reducing the variability of hourly power supply is evaluated by integrating the wind and solar power generation technologies.

Is it time for solar B2B e-procurement trading platforms?

Sellers gain access to a larger market base and reach customers they would otherwise miss. The time has come for solar B2B e-procurement trading platforms. Kadeer Beg is the Chief Operating Officer of Sunhub, a B2B e-commerce marketplace for solar and renewable energy equipment and components.

How does cross-border electricity export benefit a country?

First, the profit from the cross-border electricity export is maximized for a country in the region. Subsequently, the capital cost, operation and maintenance (O&M) cost, and hybrid wind/solar power system variations are minimized.

What is a solar B2B trading platform?

A solar B2B trading platform gives EPC contractors access to a broader supplier base, allowing them to shop for the best price, issue RFQs and finalize transactions. For any B2B solar marketplace to succeed, it needs: Industry-wide coverage - Access to every component from solar panels to cable.

Can a business sell solar products alone?

Solar products are seldom sold alone. To switch to solar, businesses need advisors, and consultants, and even installation providers to set up solar power systems at their commercial establishments. You can build a custom eCommerce solution where you can also advertise your installation and consultation services.

Can solar/wind hybrid systems supply the electricity trade in Iran?

Consequently, Iran can supply 20% of the total demand of the electricity trade by wind and solar system installed capacities of 316.5 and 267 MW, respectively. The proposed model is valuable for the design and evaluation of solar/wind hybrid systems to supply the electricity export.
