Why is my solar garden light not working?

Most of the outdoor solar garden lights come with ON/OFF button, and that button needs to be turned ON. In many cases this simple thing is ignored by many people and this is one of the main reasons why your solar light isn't working as expected. There might also be a factory defect and the light doesn't turn ON. 2.

How do you fix a solar light not working?

To fix solar lights not working, check and remove the battery pull tab, replace or deep charge the batteries, repair any damaged wiring, clean the solar panels, and ensure they're positioned in direct sunlight. How Do You Reset a Solar Light?

How to fix outdoor solar lights?

Here is a step-by-step guide on how to fix outdoor solar lights: Ensure that the solar panels receive adequate sunlight during the day. Clear any obstructions that may cast shadows on the solar panels, hindering charging. Clean the solar panels regularly to remove dirt, dust, or debris that can affect efficiency.

Why are my solar lamps not working?

If you've recently purchased solar lamps and they're not working, one common reason could be the presence of a pull tab on the battery. A pull tab is a small piece of insulator that is specially designed to prevent batteries and circuits from energizing -- protecting them during shipping and storage.

What keeps new solar lights from working?

Another oversight that keeps new solar lights from working is loose internal wiring or disconnected circuitry inside the light housing. Carefully inspect connection points between the solar panel, battery, controller, and LED lights. Check for pinched wires or any gaps/corrosion at solder joints and wire terminals.
