

Solar power in South Wales

Who is South Wales solar?

South Wales Solar. We're a South Wales, family business. We live and breath local, and we're committed to this community and the people in it. Solar panels are already saving millions of people, millions of pounds, and as technology has improved, the cost of implementation has decreased.

Do solar panels work in Wales?

Solar panels can work well in Wales, as the country receives more sunshine than the UK average. Of course, the system's efficiency may vary with the direction the panels face and the time of the year. Even on the sunniest days, your solar panels must be installed in the right place for maximum efficiency.

Can you save money on solar panels in Wales?

For the average home, you could save up to £16,500 in 25 years and break even in 8 years. Welsh government solar panel grants, like the Welsh Nest Scheme, can enable homeowners to access free solar panels in Wales. Potential UK-wide solar grants for eligible households can reach up to £10,000.

Why should you choose South Wales solar?

The right products is critical to ensure stored energy can be used at your leisure, producing savings and exporting excess energy back to the grid - earning you money. South Wales Solar is hardware, software and utility provider independent. This means that our only commitment is to our customers.

Are Welsh homes going solar?

With the cost of solar panels dropping, homes all over Wales are going solar. According to the MCS, around 100,000 households in Wales now have solar panels, meaning over 7.5% of Welsh households are cutting their electricity bills with renewable energy from the sun. In fact, Wales has the highest uptake of renewables per household in the UK.

What are solar panel grants in Wales?

By taking advantage of solar panel grants in Wales, residents can generate their own electricity, reduce dependence on the national grid, and achieve significant savings on energy costs.
