Will the demolition of a Nottinghamshire Power Station create thousands of jobs?

More info The demolition of a Nottinghamshire power station and the cutting edge industry hub planned to replace it could create thousands of jobs. Ratcliffe-on-Soar Power Station, owned by international energy company Uniper, will close at the end of September 2024 in line with government policy to end coal-fired power generation.

Will Ratcliffe-on-Soar Power Station be decommissioned?

Demolition of the cooling towers and the rest of the 655-acre site will start once decommissioning is complete. Follow BBC Nottingham on Facebook, on X, or on Instagram. Send your story ideas to eastmidsnews@bbc.co.uk or via WhatsApp on 0808 100 2210. Ratcliffe-on-Soar Power Station is closing after 57 years generating electricity.

What happened at a former power station in Nottinghamshire?

Further demolition work has taken place at a former power station in Nottinghamshire. Residents were warned of explosions at Cottam, which closed in 2019 and is being cleared in stages. The latest phase saw an FGD duct - part of the emissions processing system - levelled, along with test blasts on the chimney stack and a cooling tower.

Why is the UK Power Station undergoing a two-year decommissioning & demolition process?

The power station, which has been operating since 1967, is to undergo a two-year decommissioning and demolition process. It's a symbolic moment, a marker along the UK's journey to decarbonisation and net-zero. For centuries, coal was the main source of energy in the UK.

When will the UK's last coal-fired power station stop generating electricity?

Ratcliffe Power Station in Nottinghamshire - the UK's last coal-fired power station - will stop generating electricity in just three months' time. With its eight giant cooling towers, it's been keeping the lights on across the region since 1967.

What happened to the East Midlands power station?

The site has become a landmark, having generated power since 1967. Located near the East Midlands Airport, the iconic cooling towers are set to remain in place for years as the decommissioning of the power station now gets underway.
