Does Germany have a solar mandate?

Solar Package I, approved in August 2023, aims to accelerate PV installation and enhance citizen participation, albeit, it is still under negotiation within the Parliament. While a solar mandate was considered, it was omitted in the final strategy. Yet, some German states have implemented their own mandates.

What is the solar package I?

The solar package I, which was approved by the cabinet on August 16, 2023, is a central step towards achieving the ambitious PV expansion goals by 2030. It contains a variety of measures that will accelerate the installation of solar PV both on the ground and on the roof and strengthen the participation of citizens.

Does Germany have a legal framework for energy sharing?

In Germany, even though the governmental coalition agreement in 2022 established the clear purpose to provide a legal framework favourable for energy sharing, so far no concrete measures have been adopted to date and still relies only on local self-consumption approaches without energy sharing or connection to the grid.

What is the new solar Package 1?

With the delayed but pioneering Solar Package 1, the framework conditions for the use of plug-in solar devices are further improved. The new regulations make it even easier for private households to contribute to environmental protection while benefiting from lower electricity costs.

In addition, the box has a built-in AC surge protection device for protection against grid generated voltage surges. Furthermore, the box contains a power quality meter that displays system information such as grid voltage and frequency, phase ...

Since the Solar Panels have reverse diode protection in them already, what is the purpose of also having these in the combiner box? Diode forward voltage drop is typically close to .5 volts, which when multiple by 4 and then, in my case 15 amps per line results in an additional 30 watts power loss.
