

Solar rooftop photovoltaic panels

Can solar panels be installed on a roof?

The solar panels and flashings can be fitted to the roof first and then the roof covering fixed around them. Integrated solar panels are also easy to install as a retrofit option. Simply remove the necessary section of roof tiles or slates, and replace with the solar panels.

What is a solar roof system?

The system is made up of individual panels mounted onto the roof which sit on top of your existing tiles or other roof finish. This solar roofing system is proven and widely available, but the main downside is the aesthetics. With an on-roof system, the panels are clearly added on as an afterthought and are not integrated into your home.

What is roof-mounted solar PV?

The roof-mounted solar PV is installed at the optimum angle for each latitude and is sun-facing and shade-free to generate maximum electricity output. The building rooftops are flat in design leading to the utilization of the entire rooftop for the installation of solar panels.

Are solar PV roof tiles a good choice?

An ideal choice for both roof refurbishments and new-build projects, Solar pv roof tiles provide an uncluttered aesthetic with no visible brackets or racking, as well as easy maintenance and our market-leading 15-year guarantee. Marley SolarTile® can be fitted as part of a typical roofing project and installation is fast.
