Does SolarPack have a solar PV plant in Peru?

Solarpack has finalized a significant financing agreement for the San Martin solar PV plant in Peru, securing a total funding of \$176.6 million.

What does SolarPack's solar PV financing agreement mean for Latin America?

Solarpack's groundbreaking financing agreement for the San Martin solar PV plant in Peru, totaling \$176.6 million, signals a milestone in renewable energy finance. The project, backed by leading lenders and designated as green financing, underscores Solarpack's commitment to sustainability and renewable energy development in Latin America.

What is SolarPack & Kallpa Generacion?

The ground-breaking follows a long-term power purchase agreement (PPA) that Solarpack signed with Peruvian generator Kallpa Generacion. Under the PPA, Kallpa will off-take all electricity generated by the San Martin plant, the Spanish solar developer stated. The solar farm site is located in the district of La Joya, Arequipa province.

Does SolarPack have a project in South America?

PV Tech has contacted Solarpack for information on the technologies and suppliers for the site. Solarpack has a significant foothold in South America. In March 2022, it signed a contract with the government of Ecuador to develop another regional milestone project in the 258MW El Aromo site, which it said would be the largest in the country.

Will San Martin be the 'largest' project in Peru?

It said that the site will be the "largest" in the country upon completion in Q2 2025. The San Martin project is already contracted under a power purchase agreement (PPA) with Peruvian private electricity provider Kallpa Generacion, one of the largest players in the country's electricity market.

Will Kallpa off-take electricity from San Martin solar plant?

Under the PPA, Kallpa will off-take all electricity generated by the San Martin plant, the Spanish solar developer stated. The solar farm site is located in the district of La Joya, Arequipa province. According to Solarpack, the new plant will be equipped with 665-Wp solar photovoltaic panels mounted on single-axis tracking systems.
