SolarBoost shoes are great for neutral runners who want all-terrain support during longer runs. It offers Torsion stability and focused Boost cushioning. SolarGlide shoes are good for daily runs and offers strong medial support paired with a breathable mesh upper. Shop for Solar shoes at adidas.

Are solarglide shoes good for running?

SolarGlide shoes are good for daily runs and offers strong medial support paired with a breathable mesh upper. Shop for Solar shoes at adidas. Start checking off your fitness goals in running shoes with the cushioning and support to put in the miles.

Is the Solar a rocker plated shoe?

The Solar is not a rigid rocker plated type shoe as say the Boston 10 but more akin and can be considered a successor to adidas more mid foot located Torsion system with here the LEP having a strong focus on the pronation support and then flow from the heel to transition.

Is solar control a good trainer?

The Solar Control is for sure not a speed shoe for me and not what I would prefer for an all round daily trainer. As a recovery run shoe and for long and easy, no agenda no worry about pace when tired runs, it delivers a solid (that is for sure) forgiving enough ride for both neutral and pronation control trainer fans.
