

Solarise energy Niger

What is the Niger solar energy access project?

The World Bank-funded Niger Solar Electricity Access Project enables farmers to buy pumps. Based on its success, a broader \$800-million solar energy project - Niger Accelerating Electricity Access (HASKÉ) - will integrate grid power, mini-grids, and off-grid solutions for electricity and clean cooking.

Who is SolarISE Africa?

At Solarise Africa we have expertise in leasing, financing and investing in Africa's renewable energy sector. We specialise in captive rooftop and ground mounted solar projects ranging from 50kW to 3MW, and we are fast expanding. At Solarise Africa we have expertise in leasing, financing and investing in Africa's renewable energy sector.

Are there any off-grid solar energy systems in Niger?

There is considerable experience of off-grid PV electrification, water pumping and solar water heating systems in Niger. Each of these will be explored below. The main decentralised renewable energy system being promoted in Niger for rural electricity is solar PV.

Where is solar energy used in Niger?

Niamey and Zinder, located at lower latitudes, show less variability across the year, hence making them excellent locations for harnessing solar energy. There is a long history of solar energy use in Niger. This began in the mid-1960s when the Centre National d'Énergie Solaire (National Solar Energy Centre; CNES) was established.

Is solar energy a key to economic transformation in Niger?

"Increasing access to electricity through solar energy in Niger, especially in rural areas, is key to economic transformation and empowerment," says Kwawu Mensan Gaba, Practice Manager at the World Bank.

Why is Niger a solar energy hub?

Niger was one of the first countries across the world to consider renewable energy technologies as a solution to its energy needs. This dates back to the 1960s, when Niger set up the Solar Energy Office (Office de l'Energie Solaire - ONERSOL), later renamed the National Solar Energy Centre (Centre National d'Énergie Solaire - CNES).
