Why should you choose Solgen power?

Solgen Power only provides high graded installationto make sure we customers are satisfied with their solar panels. Installations are done by professionals and is warrantied for 25 years. Our installation can withstand all types of harsh environments like rain,snow,hail,and heavy winds.

What is the difference between Solgen and a solar generator?

In contrast,SolGen provides power only as the site demands. Energy comes primarily from solar either directly or stored in lithium-ion batteries. The generator will only auto-start either if the battery level drops or if power demand exceeds inverter capacity,resulting in a vastly reduced generator run time and massive fuel cost savings.

How does Solgen work?

SolGen offers a massive reduction in fuel costs,saving over \$700 per week on some typical sites,plus lower generator servicing costs. SolGen's powerful solar array harvests maximum energy,cutting generator use drastically - up to 100% during summer months. Slash CO₂ and other harmful emissions on site.

SolGen offers the most efficient, sustainable and reliable means of providing power for off-grid applications in the construction, rail, highways, events, and infrastructure sectors. Traditional diesel generators typically run 24/7 consuming fuel and spewing emissions even when very little power is required.
