The Solomon Islands National Energy Policy : 2019 - 2030 contains strategic direction and key priorities for the development of the energy sector in the next 10 years which will enable a transition to sustainable economic development in ...

Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product. It effectively measures how efficiently a country uses energy to produce a given amount of economic output. A lower energy intensity means it needs less energy per unit of GDP.
