

Solomon Islands solar energy products

What is the main source of electricity in Solomon Islands?

In Solomon Islands, electricity is primarily generated through the combustion of fossil fuels. The demand for power in Honiara, the capital, has been increasing rapidly since 1996, but the power plants have not been able to keep up with the demand.

What technology is used in the Solomon Islands?

In the Solomon Islands, solar power is the main technology used for water heating in residential buildings and some government offices in urban areas. It has also been introduced for lighting in one or two villages and can be adapted as a source of energy for the rural areas.

How many solar homes are there in the Solomon Islands?

"Solomon Islands currently has one of the lowest levels of access to electricity in the region, with over 85% of the population of Solomon Islands still without access to electricity and for this project alone, we received over 6,000 applications to obtain only 2,000 solar home systems," said Mr Aimaeta.

How long do solar panels last in Solomon Islands?

The majority of solar energy systems installed in Solomon Islands last less than 2 years due to bad system design and poor user training. Superfly's systems are designed to last a minimum of 5 years (for basic systems) and 10 years for premium systems.

How to reduce energy consumption in Solomon Islands?

Air conditioning in government offices and business houses is a significant contributor to energy consumption in Solomon Islands. Proper maintenance and the introduction of more efficient air conditioners with controls that allow the system to shut down when not needed are ways to reduce energy consumption in this area.

What services does the Solomon Islands provide?

The services it seeks to provide are vital to the growth of our economy, for increasing indigenous participation in commerce and business, for encouraging foreign investment, for protecting our borders, for protecting consumer affairs, for ensuring fair trade and competition, and for ensuring market access for Solomon Islands products

Solomon Power also supports the installation of small scale grid connected micro embedded generators that convert renewable energy into electricity that can be used in your home or business premises. Sources of renewable energy can ...

There are currently NO government assistance schemes in the Solomon Islands for the installation and operation of solar PV arrays Renewable Energy Certificates The Solomon Islands does NOT have a Renewable Energy Certificate Scheme. Feed-in tariffs Solomon Power does NOT purchase excess energy
