

Can a soltaro aio2 be used on-grid?

The Soltaro AIO2 can be used both on-grid and off-grid. It is also capable of being used for an on-grid battery backup. This gives the AIO2 the ultimate flexibility for homes and small businesses who need to ensure they don't lose power when it matters most.

Can a soltaro aio2 be connected in parallel?

When grid-connected, or connected to a local micro-grid, the Soltaro AIO2 can be connected in parallel. This allows your system to be modular and expandable as your energy storage needs change. The batteries are also modular. You can add more battery storage at any time to expand your storage capacity should your needs change.

Why should you choose soltaro aio2?

As the AIO2 incorporates MPPT technology, it will always allow you to get the best out of your solar PV system. When grid-connected, or connected to a local micro-grid, the Soltaro AIO2 can be connected in parallel. This allows your system to be modular and expandable as your energy storage needs change. The batteries are also modular.

Are soltaro batteries good?

Soltaro batteries are designed to handle the harsh Australian climate, along with the vast temperature variations. In addition, temperature range, operating humidity and altitude tests were checked. Essentially, with a 100% depth of discharge, operating humidity 95% and max. altitude of 4000 m, they scored an excellent 4.1 rating.

An average Australian household is likely to save around \$570 per annum\* by switching to electric split heating alone. Hot Water Heat Pumps are much cheaper to run than their Gas counterparts. A good quality hot water heat pump like the one from Soltaro may reduce your bills by over \$300 annually\* compared to a gas system. Efficiency
