Does Somalia have access to electricity?

"Access to energy is a precondition to development, supporting livelihoods and powering essential services such as education and healthcare," said UNDP Resident Representative in Somalia Jocelyn Mason. "However, 65% of people don't have access to electricity in Somalia."

How much power does BECO produce in Somalia?

Currently, BECO produces 35 MW of power for eight cities, which is much less than its demand of 200 MW. Many Somalis avoid using electricity in order to avoid the monthly costs as 69% of Somalis are currently living in poverty. Power companies in Somalia heavily rely on imported fossil fuels for diesel-powered generators.

It develops and builds hybrid solar power plants in regions affected by extreme poverty, conflict, and climate change, where access to grid electricity is limited and power is typically expensive and generated from diesel.
