Krill at South Georgia & the South Sandwich Islands are not self-sustaining but dependent on the northerly movement of krill in the currents of the Southern Ocean from their spawning grounds under the ice in the Antarctic Peninsula and Weddell Sea. Krill reproduction is highly dependent on sea ice conditions and hence environmental factors.

Over a decade ago, as a 40th birthday present, my partner Paul took me to South Georgia and the South Sandwich Islands. I had high expectations for this famed, windswept archipelago, which is a British Overseas Territory and is nicknamed "the Galapagos of the Southern Ocean."

The area lies within the South Georgia and South Sandwich Islands Marine Protected Area. This Important Shark and Ray Area is benthic and subsurface and is delineated from 500-1,900 m based on the depth range of Qualifying Species in the area.

The ultimate goal of the Argentinian forces was to annex the South Sandwich Islands, South Georgia, and the Falklands. Despite these plans, however, the British moved in to re-take the territory, and on June 20, 1982, the British were successful in defeating the invading Argentine forces. By 1985, both South Georgia and the
