

How should solar panels be oriented in New Zealand?

Solar panel orientation - In New Zealand, the sun follows an arc to the North. Solar panels should, in general, be oriented to the North. It may also be necessary to change the orientation because of shading, aesthetic reasons, lack of available space or poor building orientation.

Could space solar be a source of electricity in Iceland?

Sam Adlen, co-CEO and executive director at Space Solar, told pv magazine the startup has already started identifying potential sites in Iceland where receivers could be located for electricity beamed from space, working in partnership with Reykjavik Energy and local cleantech consultancy Transition Labs.
