Is nextpower V ESG a good investment for Spain?

"NextPower V ESG now has 358MW installed capacity in Spain, a country that benefits from one of the highest levels of irradiation in Europe. Spain remains an attractive target for further opportunities for NextPower V ESG due to its mature PV market, renewable energy sector track record, and well-developed infrastructure."

How big is NPV ESG?

NPV ESG's portfolio has now reached 574MW of capacity across the US, Spain, and Poland with a further pipeline in exclusivity and advanced negotiations that would bring the total capacity of the NPV ESG to above 1 GW of PV solar assets across target geographies.

How much money has NPV ESG secured?

NPV ESG has secured \$745 million (including \$150 million for co-investments) in total commitments with investors ranging from a UK LGPS investment pool and a Dutch pension fund, alongside re-ups from existing NextPower III ESG investors, including KLP, a German occupational pension fund, and a large Nordic pension fund.

What is NPV ESG?

Upon reaching its investment ceiling and delivering c.4-5GW, NPV ESG is forecasted to generate enough clean energy to power the equivalent of up to 1.1 million households per year and avoid an estimated fossil fuel consumption of up to nearly 220 million m<sup>3</sup> of natural gas annually.
