

# Specialized Energy Storage System Sales Skills

What skills do you need to work in energy storage?

One of the most obvious and essential skills for working in the energy storage and renewable energy sector is technical skills. This includes having a solid understanding of the different types of energy storage technologies, such as batteries, flywheels, pumped hydro, compressed air, thermal storage, and hydrogen.

What are the different types of energy storage technologies?

This includes having a solid understanding of the different types of energy storage technologies, such as batteries, flywheels, pumped hydro, compressed air, thermal storage, and hydrogen. It also involves knowing how to design, install, operate, and maintain renewable energy systems, such as solar, wind, hydro, biomass, geothermal, and tidal.

What are business skills?

Business skills involve being able to assess the feasibility, viability, and profitability of energy storage and renewable energy projects, taking into account the costs, benefits, risks, and opportunities.
