Who makes the best solar panels in Sri Lanka?

Hayleys Solar partners with leading tier-1 solar panel manufacturers around the world to provide the best solar panels in Sri Lanka. All our solar system projects are fitted with durable and conversion-efficient solar panels to ensure that our customers receive long-lasting solar systems.

How does a solar system work in Sri Lanka?

**Solar Panels:** These are the most visible components of a solar system. Solar panels convert sunlight into direct current (DC) electricity. The efficiency of these panels can vary, but in Sri Lanka, with its average solar irradiation of around 4.5 to 5.5 sun hours per day, solar panels can generate significant amounts of electricity.

Why should you choose a residential solar system in Sri Lanka?

Adopting a residential solar system in Sri Lanka can lead to substantial savings on electricity bills, enhance energy security, and contribute to environmental sustainability. Whether opting for an on-grid, off-grid, or hybrid system, working with certified professionals is crucial to ensure a properly designed and installed system.

How much does a solar system cost in Sri Lanka?

Residential solar installations in Sri Lanka typically start at around 500,000 LKR to 750,000 LKR for basic setups. With a budget of 500,000 LKR, you can generally expect a solar system producing approximately 2 kW to 3 kW of power. If you have a budget of 750,000 LKR, the system size might range from about 3 kW to 5 kW.

How to install rooftop solar in Sri Lanka?

A large number of service providers exist in Sri Lanka contracting the installation of Rooftop Solar. They must register at the Sri Lanka Sustainable Energy Authority (SLSEA). Therefore, it is important to select an institution that is registered with SLSEA which they publish a list of registered service providers in SLSEA website.

What is the average payback on solar power in Sri Lanka?

The average payback on solar power in Sri Lanka is 5 years. After this payback period, you are earning money on your roof. Best choice when your bill is high and you have limited roof space. Zero your bill if you generate electricity as much as you consume. The energy you consume - Energy generated through solar = what you pay.
