Is Madagascar ready for solar power?

With all regions of Madagascar enjoying over 2,800 hours of sunlight per year, the Grande Ile is the perfect location for development of solar power, with a potential capacity of 2,000 kWh/m<sup>2</sup>/year. The Government is counting on this potential to fulfill its objective of providing energy access to 70% of Malagasy households by 2030.

Where should I start a solar business?

The best place to start a new solar business is between the cracks of large, over-saturated markets. Find out what solar professionals are doing in your area by checking in with local SEIA chapters and chambers of commerce, and conducting internet searches.

How much solar power does Madagascar have?

With only a 15% connection rate, Madagascar faces a chronic lack of access to electricity, which hampers its economic and social development. However, there is tremendous potential in terms of solar power, estimated at 2,000 kWh/m<sup>2</sup>/year as a result of the 2,800 hours of annual sunlight the country enjoys.

Does Madagascar have a business climate?

In the World Bank Group's Doing Business 2018 report that assesses the business climate, Madagascar ranks 184 out of 190 countries for access to electricity. Keenly aware of this challenge, in 2014, the Government of Madagascar decided to embark on intensive reforms to transform the sector.

What is Scaling Solar in Madagascar?

Madagascar is currently the fifth country in Africa in which a Scaling Solar tender process was launched, after two tender processes in Zambia, one in Senegal, and another in Ethiopia. It is also the first Scaling Solar project to include solar energy storage requirements by pairing solar with batteries.
