

What is the storage root yield of cassava in DR Congo?

The average storage root yield of cassava reported for DR Congo over the past fifteen years (2005-2019) is 8.1 t ha⁻¹ (FAOSTAT, 2020), which is much smaller than its fresh storage root yield potential of 75-90 t ha⁻¹ (Cock et al., 1979; Fermont et al., 2009).

Does green manure contribute to cassava production in DR Congo?

Results of our study are in line with the findings by Pypers et al. (2012) who also reported significant responses of cassava from the combined use of NPK and organic inputs (green manure) in Bas-Congo province (DR Congo).

What is the rainfall pattern in Kalehe DR Congo?

The study was conducted in Kalehe (2.069-2.162° S; 28.853-28.922° E; 1474 - 1630 m a.s.l.), a territory of the province of South Kivu in the Eastern part of the DR Congo. Rainfall pattern in Kalehe is bimodal and allows crop cultivation during two seasons.

Stem Inc has posted record quarterly revenues for Q3 2022, with the AI-driven energy storage company claiming it could begin recording positive EBITDA figures in the second half of next year. In its latest financial results, published yesterday, the company reported US\$99.5 million revenues for the period ending 30 September.

Total biomass yield (storage root + stem) was significantly increased by 28% (11.2 t ha⁻¹) through the use of an improved variety with fertilizer in the first year while in the ...
