The Nordic Series has been developed by SUNBEAMsystem for use in its region of origin: the northern latitudes. It offers a universal solution for applications with a requirement for lightweight, flexible, and compact solar panels. Because they are more efficient than standard glass solar panels you'll get higher production from a relatively small size.

It does resemble a slim laptop casing more than a powerful solar panel. Folded size is smaller in all dimensions. Thanks to the one-piece construction and the extremely flat-sized junction box. Following industry-standard solar panel equipment, the Fold Series solar panel utilizes waterproof MC4 connectors.
