

Sunflower solar system France

What is a smartflower Solar System?

Smartflower is the first comprehensive solar system, which works through a simple plug-and-play like any regular home appliance. The Smartflower was developed by SmartFlower(TM) company through innovative construction and the perfectly synchronized components. The key features of Smartflower are below:

Does smartflower solar have a US division?

As for the company's US division, SmartFlower Solar is also getting on quite well (CEO of the division Jim Gordon owns all the SmartFlower intellectual property rights for the American continent, which makes SmartFlower Solar completely independent of its European counterpart).

How much does a smartflower solar panel cost?

Now, let's talk about the numbers. How much does the SmartFlower cost? Before applying for all incentives and tax credits, the SmartFlower solar panel system ranges in price from \$25,000 to \$30,000 with the average cost to install at \$27,000. There are two models that you can choose from, and this is why the price can vary.

What is a Solar Flower & how does it work?

Standing at a height of 5 meters (16.4ft), this "solar flower" takes its inspiration from mother nature, as it rotates throughout the day in the same way as sunflower petals do. Thanks to this, the sun-tracking solar flower can produce 40% more electricity than what could conventional solar panels.

How much solar energy does a smartflower produce a year?

Depending on location, a SmartFlower can produce 3,800 to 6,200 kWh of solar electricity per year - which is around 40% more than compared to what conventional solar panels produce.

What are the different types of smartflower solar panels?

Smartflower is available in 2 different variants: Smartflower and Smartflower+Plus. The Smartflower+Plus comes with a domestic storage battery that can store excess energy for later use. How is Smart flower Different from Regular Solar Panels?

SmartFlower is an all-in-one residential solar system that's easily installed by trained professionals (3-4 hours), offers a small footprint (approximately 5 feet square), cleans itself of dirt, dust and debris twice a day, is fully automated and basically maintenance-free. Harness the sun and be a neighborhood icon with the eco-friendly ...

Indisponibilité de la SmartFlower en France en 2018 Fin 2017, l'entreprise autrichienne ayant développé la SmartFlower a malheureusement fait faillite.
