A SunFusion Solar residential solar system lets you become a customer-generator for the utility company, a special type of customer that utility companies are bound by law to purchase excess power from. Unused solar power generated by your system is automatically routed to the utility grid. As the excess power is transferred to the grid, your ...

sunfusion solar co., ltd. ??????:0105567146280  
?? ...

SunFusion Solar introduces a new generation of solar - the IDES3 Hybrid Energy Storage System. This is a battery storage system used to store any excess solar energy that is generated by your system during the day and use that stored energy at night. If the stored energy in the batteries runs out, the grid is still there as further back up ...

Sunfusion has a hybrid system that runs on batteries that fit in the space of a refrigerator. There is an electric meter to SDGE with a switch which will automatically switch to the grid should it be needed, thus hybrid. We had Sunfusion install a system on our duplex in Encinitas and it is running both units.
