

Sunny island multicluster box Turks and Caicos Islands

What is a multicluster box?

The Multicluster Box for the Sunny Island 4548-US and 6048-US is the ideal solution for the easy installation of off-grid systems up to 100 kW. Two to four three-phase clusters, each with three Sunny Islands, can be connected in parallel.

What are SMA multicluster-boxes for Sunny Island Battery inverters?

With the SMA Multicluster-Boxes for Sunny Island battery inverters, both off-grid systems and battery-backup systems* can be configured easily and cost-efficiently.

Are sunny island inverters based on off-grid technology?

The new SMA Sunny Island 4548-US and 6048-US inverters are based on the proven off-grid technology in the Sunny Island 5048-US but now feature 20 percent more power output. A maximum efficiency of 96 percent ensures peak production, which results in reduced diesel usage in rural communities.

How many sunny island inverters can be installed?

In regions without grid access, based on proven technology, powerful off-grid and hybrid systems with 2 to 12 three-phase clusters, each consisting of 3 Sunny Island inverters of up to 360 kilowatts of output capacity can be installed. For systems connected to the utility grid, battery-backup systems* with up to 138 kWp can be set up.

How does sunny island work?

Because solar energy is available all over the world, most Sunny Island system solutions are primarily based on the use of solar panel power. Moreover, solar panel systems are highly adjustable and wear-resistant. Sunny Island also takes advantage of generators or AC utility grid to charge batteries.

Are on-grid multicluster systems allowed in Europe and Australia?

*On-Grid Multicluster systems with self-consumption at the grid connection point are not permitted in Europe and Australia. However, standard battery backup systems and the grid operating mode as generator are possible because in both cases the battery can only be charged in parallel grid operation.
