

Sunroom built with photovoltaic panels

Can a sunroom function as a greenhouse?

Follow these principles when building a sunroom addition and you can get the triple benefits of a cozy living space, free solar heat, and a super greenhouse for plants.

What makes a sunroom a great addition?

Sunrooms are the perfect four-season addition to increase the view and create a focal point for any home or business. Solar Innovations' custom designed structures include durable aluminum framework. They are tailored with the most comprehensive line of aluminum accessories in the industry.

What is a pre-fabricated sunroom kit?

A pre-fabricated sunroom kit has been previously designed and built in a factory. Companies that design and build pre-fabricated sunrooms create a number of styles, shapes, and sizes so that homeowners can find one that best matches their own homes. Pre-fabricated sunrooms are made of steel, aluminum, tempered glass, and foam insulation.

Are sunroom walls insulated?

The walls are always substantial 16- or 24-inch on-center wood-framed, insulated walls. The sunroom aspect is that these walls are populated with far more windows than might be found in an ordinary sitting room. From the exterior, these custom-built hybrid sunroom-bumpouts blend in well with the rest of the house.

Does a glazed sunroom add value?

In addition, the addition of a glazed structure adds to the property value. Residential sunrooms can be designed as small additions or large, free standing structures. All dimensions, shape, materials, and configurations are custom designed for each project.

Do sunrooms add value?

Not only do sunrooms expand conditioned living space, they also provide natural light, protection from the elements, and scenic seating areas for dining or simply enjoying nature without having to leave the building. In addition, the addition of a glazed structure adds to the property value.
