

Sunset solar Russia

Durante este período, la tecnología solar se convirtió; a la vez en un recurso energético independiente. Debido a los rápidos avances tecnológicos, la energía solar ya no es la fuente de energía para unos pocos usuarios; más bien, ahora cualquiera que quiera actuar responsablemente en pro de su propio futuro y el de sus descendientes, puede contribuir de ...

The farther a country is from the equator, the more oblique the sun's path is to the horizon, causing sunset to last for a different duration. Moscow lies on the 56th degree of northern latitude and is therefore very far away from the equator. While a sunset near the equator lasts only about 20 minutes, in Russia, this period averages 104 minutes.
