Paired with specific solar panels, this unique hybrid supports system oversizing by up to 150%, resulting in a 150% increase in energy yield. For instance, a 5KTL inverter can support a 7.5 kWp system, providing 5KW full power AC output for daytime energy consumption and 2.5KW power battery charge for nighttime energy use.

The function of the inverter. The inverter is a power conversion device whose main function is to invert the DC power of the battery into AC power. Through the full-bridge circuit, the SPWM processor is generally used to modulate, filter, boost, etc., to obtain the load frequency, rated voltage, etc.

I spent almost 2 months at Kristin and Steve's house. A uniquely beautiful apartment, warm, cozy and equipped with everything you need for everyday life. The view is unbeatable and I was allowed to watch as from the end of September the days became shorter until the beginning of the dark season, the "Dark Season", at the end of October.
