A 15 kW solar system can substantially benefit homes and businesses, potentially saving around &#163;58,980 over its 25-year lifespan. This estimate is based on the current grid electricity price of &#163;0.245/kWh (as of October 2024), which translates to roughly &#163;2,359.21 per year in savings. These savings could be even higher considering inflation and future ...

Serbia is mostly an energy importer of oil and natural gas which, along with coal products constitute around 90% of its yearly energy consumption. Although the country has produced oil and gas in small quantities since the mid-50s, it is heavily reliant on imports, mostly from Russia. In March 2013 a long-term deal was signed with Gazprom to extend gas imports of more than ...
