This study presents a framework with a decision making algorithm named SWAPP which leverages energy usage data to learn an energy management policy in urban energy systems using swarm intelligence (SI) agents. The core components of SWAPP include an unsupervised K-Means classifier for tailored decision making, a reward mechanism that promotes ...

However, Azerbaijanis have come to see Moscow as too sympathetic to Armenia and the self-proclaimed ethnic Armenian authorities in Nagorno-Karabakh. At the same time, Armenians are dissatisfied with Moscow's actions -- or lack thereof -- in the face of perceived Azerbaijani pressure and despite Armenia's security arrangements with Moscow.

The gas for electricity agreement between Armenia and Iran has been extended until 2030 and enables Armenia to import greater volumes of natural gas and export more electricity. "I believe that in terms of the legal documentation we have implemented the important phase and soon, as required, according to needs and also infrastructures, we ...
