

What's going on in the field of hydrogen in Sweden?

It is well known that LKAB, SSAB and Vattenfall have produced the world's first fossil-free steel in Sweden and that the young company H2 Green Steel is building new green steel production in Boden. It is more rare that it is revealed how much activity is going on in the field of hydrogen in Sweden.

What is H2 Energy E-reformer?

H2 Energy presents a novel reformer based on 3D printed materials with electrical heating. An electrified update of the world's most used hydrogen production method - steam reforming. An innovative technology that can provide additional value for your company. What is e-Reformer?

How many hydrogen filling stations are there in Sweden?

Sweden has two strong suppliers of heavy vehicles with adaptation for hydrogen as a fuel, and over 60 hydrogen filling stations in the planning stage.

What's new in hydrogen production?

A new approach for hydrogen production: an electrified update of the steam reforming reactions.

H2 Energy AB was founded by a group of scientists from Royal Institute of Technology, KTH Stockholm, in cooperation with some experienced businessmen, all with vast experience in thermochemical and industrial processes. We want to develop and deliver components, engineering and complete processes for hydrogen production.

Policy/ project Spotlight Pioneering green steel projects: H2 Green Steel, a company founded in 2020 with the aim to build a large-scale green steel production in northern Sweden, is one of the pioneering companies aiming to use green hydrogen to decarbonise industrial processes is building its first mass production plant for emissions-free steel in the town of Boden.

Dies erm&#246;gliche H2 Energy Europe, sich mit der „Entwicklung gro&#223;er gr&#252;ner Wasserstoffprojekte und Vertriebsnetze in ganz Europa" zu befassen, w&#228;hrend sich die H2 Energy Holding AG „auf ihr Kerngesch&#228;ft und die Technologieentwicklung konzentrieren wird", sagt Julien Rolland, Head of Strategic Projects and Investments bei Trafigura.

Ovako is collaborating with the Volvo Group, Hitachi ABB Power Grids Sweden, H2 Green Steel and Nel Hydrogen to invest in hydrogen production in Hofors for a fossil-free steel production facility, H2Bulletin ...

H2 Engineering's AES electrolyzer technology is scalable and will enable the full decarbonization of energy-intensive industries via the use of green hydrogen for industrial applications, such as: fuel in rotary kilns in the metallurgical and cement industries where fossil fuels will ...

Launched in 2021, Stegra previously secured EUR6.5bn to develop the "world's first" large-scale green steel plant in Boden, Sweden, with the start of production expected for 2026. Read more: H2 Green Steel signs EUR4.2bn debt financing agreements for Boden plant According to the firm's statement, Stegra represents three distinct platforms: Green hydrogen, with one of

The EIB and the Nordic Investment Bank (NIB) will take part in the project finance deal to support H2 Green Steel's large-scale production facility in Northern Sweden. The EIB will contribute EUR314 million, of which EUR200 backed by a guarantee from the European Commission under the InvestEU programme, and EUR114 million of intermediated financing to be ...

## Sweden h2 energy kft

H2 Energy partecipa alle pi&#249; importanti fiere ed eventi ed eventi del settore, per illustrare i propri prodotti e le ultime novit&#224; sia in termini di tecnologia che di applicazioni dell'idrogeno. Inoltre dal punto di vista scientifico presenza ai pi&#249; prestigiosi convegni e workshop per apportare il proprio contributo allo sviluppo ...

H2 Energy was founded in August 2014 with the goal of playing an active role stopping climate change. We want to make hydrogen from renewable energy a cornerstone of the energy system. This can only succeed if the entire value chain across production, distribution and consumption is expanded sustainably and economically. ...
