

What is the Orana Bess?

A large-scale BESS is beginning construction near Wellington in central-west NSW. Known as the Orana BESS, it has a capacity of 400MW, and provides up to 8 hours or 1660MWh of energy storage, delivered in two stages. The proposed site lies approximately 2km north-east of Wellington, adjacent to TransGrid's 330kV zone substation.

What is Akaysha's Orana Bess?

Akaysha's Orana BESS is being developed within the Central West 'Orana Renewable Energy Zone', adjacent to the TransGrid substation near Wellington, NSW. Early works have begun on the project, which will feature Tesla Megapack technology and Balance of Plant (BoP) will be delivered by Consolidated Power Projects Australia Pty Ltd (CPP).

What is the Orana Bess project?

The Orana BESS Project aims to strategically enhance the Central-West Orana REZ, supporting the transition to increased renewable energy.

What is the capacity of Orana Bess?

Known as the Orana BESS, it will have a capacity of 415MW and provide 4 hours or 1660MWh of energy storage. Akaysha is preparing to commence construction activities including road upgrades at the intersection of the site access. The Orana BESS will support capacity in the Central-Orana Renewable Energy Zone.

What is Akaysha Energy's Orana Bess project?

Following this approval, Akaysha Energy has begun an extensive consultation process with key project stakeholders to develop Management Plans appropriate to the Orana BESS project. Discover Akaysha Energy's Orana Battery Energy Storage System (BESS) project, advancing renewable energy storage for a sustainable future in Australia.

Where is Akaysha preparing to build the Orana Bess?

Akaysha is preparing to commence construction activities including road upgrades at the intersection of the site access. The Orana BESS will support capacity in the Central-Orana Renewable Energy Zone. The proposed site is approximately 2km north-east of Wellington, adjacent to TransGrid's 330kV zone substation as depicted below.

The Orana BESS will be one of the first systems in Australia to deliver a four-hour system, significantly increasing the value of utility-grade battery storage to stabilise the national energy grid during

The Orana BESS is expected to commence commercial operations in 2026. Success in the tender process saw the Orana BESS awarded a Long-Term Energy Service Agreement (LTESA), an initiative run by the ASL as

part of the Capacity Investment Scheme as a means of ensuring revenue security by "topping up" a project's expected revenue from the ...

The target capacity of the Wellington BESS is 500 MW / 1,000 MWh, making it one of the largest battery storage projects in NSW. The Wellington BESS will connect to the adjacent TransGrid Wellington substation, adjacent to the Central West Orana Renewable Energy Zone (Central West Orana REZ).

Nordic Solar to build 10MWh BESS in Denmark, eyes 1GWh pipeline. International developer and IPP Nordic Solar has entered the BESS market with a 10MWh project on home soil, in Denmark. The BESS will be in Borup in the municipality of Hillerod on Zealand and will be the first of many more BESS projects for the company.

The Bredhølla project will be the largest BESS in Sweden when online, though a much larger 93.9MW/93.9MWh project is being built by Neoen and Nidec for a 2025 commissioning. BESS projects in Sweden primarily target the country's ancillary service markets, historically provided by hydropower assets which are increasingly being displaced by BESS.

The funding brings the capital invested in Akaysha's Australian energy storage projects to a total of \$3 billion, and will finance the construction of Akaysha's Orana BESS project near Wellington, NSW, in the Central West Orana Renewable Energy Zone. The Orana BESS is set to add more than 1660MWh to Australia's National Energy Market.

The Orana BESS, located in Wellington NSW, will be delivered under a. Akaysha Energy has signed a Long-Term Energy Service Agreement which will support the build and operation of a groundbreaking 415MW/1660MWh utility-grade battery energy storage system under a competitive tender from AEMO Services, and features the largest capacity of all ...

Akaysha's Orana BESS is being developed within the Central West "Orana Renewable Energy Zone", adjacent to the TransGrid substation near Wellington, NSW. Early works have begun on the project, which will feature Tesla ...

The Orana battery energy storage system (BESS) project in New South Wales, Australia, has reached an agreement for A\$650 million with Akaysha Energy. Situated in the Central West Orana renewable energy zone, the Orana project will be built with funding from the three-year facility. The project is scheduled to be online in 2026 with a 1,660 MWh ...

Akaysha Energy is backed by major investment group Blackrock and is behind a number of Australia's other biggest BESS projects, including the 1.65GWh Waratah Super Battery and 1.66GWh Orana BESS, ...

14 large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW / 211 MWh into the region. Developer and optimiser Ingrid Capacity and energy storage owner-operator BW ESS have ...

Sydney-based battery developer Firm Power has secured permission to build a 150-MW standalone BESS facility in the Hunter-Central Coast Renewable Energy Zone (REZ). ... south of Dubbo, ACEnery was cleared to build a 120-MW battery within the Central-West Orana REZ. The two projects are expected to inject AUD 280 million into the New South ...

With a project value exceeding \$650 million, the Orana BESS is slated to commence operations in 2026, marking a significant milestone in Australia's renewable energy sector. CPP's regional manager for New South Wales, Abdul Dabaja, expressed his enthusiasm for the collaboration, stating, "This achievement would not have been possible ...

The Orana BESS is expected to commence commercial operations in 2026. Andrew Wegman, managing director and chief financial officer at Akaysha, said: "We are very pleased to announce the successful closing of the debt financing of the Orana project as we move into construction on Akaysha's first four-hour BESS to date. As the largest ...

"Rocmore Energy is delighted to expand our presence in the Swedish energy market. The acquisition of the 17 MW BESS project, made together with our partner Pyrios, marks another milestone in Rocmore Energy's ambitions to enable the transition to renewable energy by providing robust energy storage solutions in Sweden," said Rocmore's COO Johan Thorpenberg.

It is the first from Axpo in Sweden and was acquired in-development from developers RES and SCR in March 2023. That acquisition was followed shortly by a solar-plus-storage project with a 25MW BESS acquired ...
