

What is the Swiss battery technology center?

At the Swiss Battery Technology Center, we research the sustainability of electrification, operate Switzerland's largest battery test laboratory with Bern University of Applied Sciences BFH, and show how batteries can be taken apart and materials reused. We are committed to a high recycling rate of the entire battery.

Who is Swiss battery?

Our company SwissBattery.com develops battery products and materials for the electric automotive & aerospace market. Our target is top benchmarking. We focused at an early stage of the product development on energy use and cost. Our products are resilient in increasingly regulated and clean emerging markets.

Why should a company join the Swiss battery technology center?

Companies interested in creating better products for customers and the world will find a vital partner in the Swiss Battery Technology Center. The Center provides support throughout the product lifecycle and views itself as a long-term partner for the future evolution of the developed product.

What is Swiss battery used for?

The technology of Swiss Battery is suitable for a high-energy /high-power applications which can boost the range of electric airplanes. Electric aircraft are all sizes, from electric passenger airplane to all sizes of unmanned aerial vehicles (UAV) used for agricultural applications and defense.

What are Swiss battery engineers doing?

Swiss Battery engineers have secured multiple inventions that are substituting critical heavy-metals with tailor-made, renewable battery raw materials. Science is the basis of our discoveries and innovations.

Portable and consumer batteries BATREC was originally founded to process batteries collected in Switzerland. We can process any type of cell and battery such as: alkaline cells, Zn-air, Zn-C, button cells, Lithium batteries (eg LiMnO<sub>2</sub>) Li-ion batteries (Phones, E-bikes, electric vehicles, electric tools) or even NiMH accumulators.

Swiss Battery is committed to the promotion and development of modern battery technologies, especially for electromobility (e-mobility), for aviation and Mobility 4.0, the development of which has a lot of catching up to do in Europe.
