

How does Switzerland contribute to the future of electricity storage?

With its hydroelectric power plants in the Alps and innovative projects, Switzerland is contributing to the search for solutions for the efficient, long-term storage of electricity. A journalist from Ticino resident in Bern, I write on scientific and social issues with reports, articles, interviews and analysis.

Is Switzerland able to store energy?

The global challenge is not only to produce more energy from renewable sources, but also to be able to store it. With its hydroelectric power plants in the Alps and innovative projects, Switzerland is contributing to the search for solutions for the efficient, long-term storage of electricity.

How does Switzerland generate electricity?

Switzerland already generates most of the electricity it consumes from renewable energies (75%), mainly via hydroelectric power stations. In recent years there has been an increase in photovoltaics, and to a lesser extent in wind power. Solar panels are popping up all over the country, even in the most unthinkable places.

Are Swiss power stations better than other countries?

Compared to other Alpine countries, such as Austria, Germany and Italy, Swiss power stations generally have larger water-retention basins and are therefore able to operate over longer periods, notes the Association of Swiss Electricity Companies.

Why is Switzerland drafting a new electricity supply law?

European market developments and Switzerland's desire to phase out nuclear power have prompted the government to draft a new electricity supply law. This law provides for the complete liberalisation of the market and the rapid development of renewable energies in Switzerland. This text will soon be examined by parliament.

Will Switzerland become Europe's 'electricity battery'?

As the Alpine glaciers slowly melt away, Switzerland will have the opportunity to build new dams and artificial lakes in the mountains. This will increase energy storage capacity in the Alps, strengthening Switzerland's role as Europe's "electricity battery".

Infinity Power, in partnership with Hassan Allam Utilities and Masdar (Abu Dhabi Future Energy Company), takes a major step by signing the Land Access Agreement with the Egyptian government for the 10GW capacity onshore wind farm project in Egypt. The initial project agreement to develop the 10 GW wind farm was signed between the consortium and the ...
