

# Syria gwl power ltd

What type of energy is primarily used in Syria?

In Syria, most energy is based on oil and gas. Some energy infrastructure was damaged by the Syrian civil war. In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society.

Will Syria reshape the balance of power in the Middle East?

The Syrian government has been toppled, and its leader sent into exile, a seismic shift poised to reshape the balance of power in the Middle East. Rebels seized the capital Damascus over the weekend, having captured Homs and other smaller cities in a lightning-fast offensive that took the incumbent government by storm.

Will Syria's new leadership be able to govern a fractured country?

With Assad's 24-year rule brought to an end, the world will watch closely as Syria's new leadership attempts to govern the fractured country.

What is Syria's political future?

Syria's political future therefore carries global significance, and all eyes will be watching as its new leaders seek to control the fractious country, navigate its complex alliances, and rebuild a nation scarred by years of conflict and division. Who has taken power Syria?

How did Syria's conflict affect the electricity system?

The conflict in Syria led to increasingly frequent blackouts across the country due to damage to the electricity system. This resulted in disruptions to all forms of economic activity and reports of electrical fires caused by problems with the electrical grid.

How many power plants were destroyed in Syria?

Violence and looting destroyed three major power plants in Syria between 2015 and 2017: the Aleppo Thermal Station, Zaytoon in Idlib, and al-Taim in Deir Ezzor. Pre-war, these three plants accounted for almost one-fifth of Syria's total generation capacity.

In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society. Demand grew by roughly 7.5% per year during this decade, fueled by the expansion of Syria's industrial and service sectors, the spread of energy-intensive home appliances, and state policies (i.e. high subsidies and low tariffs) that encouraged wasteful energy practices. Syria's inefficient transmission infrastructure compounded these probl...
