

Tajikistan largest single solar panel

USAID's Power the Future project partnered with the Government of Tajikistan and Pamir Energy to install the 200 kilowatt (kW) Murghab solar power plant - the country's largest utility-operated solar power plant and the highest in Central Asia.

At request of the Tajik Ministry of Energy and Water Resources, USAID supported the installation of the solar plant in Murghob to complement the nearby 1.5 megawatt "Tajikistan" (formerly Aksu) hydropower plant and add additional clean, renewable energy to ...

According to a study by the International Renewable Energy Agency (IRENA), Tajikistan has the potential to generate up to 220,000 GWh of electricity from solar power, which is more than ten times its current electricity consumption.

This solar plant is a direct result of successful cooperation between the Government of Tajikistan, USAID, and Pamir Energy Company. The solar power plant has a capacity of 200 kW. Estimated potential of solar energy in Tajikistan is about 25 billion kWh / year.

The U.S. Agency for International Development (USAID) representatives yesterday participated in an inaugural ceremony for the new 220-kilowatt Murgab solar power plant, which will be the largest solar power plant in Tajikistan and the highest solar power plant, by elevation, in the world.

The plant is Tajikistan's largest solar plant and the highest in Central Asia at 3'600 meters above sea level. It also connects to the existing Tojikiston 1.5MW hydropower plant (HPP) and the power produced will improve electricity provision for approximately 8'000 people in Murghab and surrounding areas.
