

Tajikistan microvast inc

Who is Microvast?

Microvast, founded in Houston in 2006, develops disruptive battery technologies for commercial and specialty vehicles, with research and development and production capabilities that span battery materials, multiple battery cell chemistries, modules and packs.

What makes Microvast a great battery company?

Forward Thinking. Microvast produces innovative and reliable lithium-ion batteries with advanced technologies. With nearly two decades of experience in battery development, we're accelerating the adoption of clean energy with the installation of more than 31,000 battery systems in 34 countries.

Why is Microvast a leader in lithium-ion battery development?

With the success of our lithium-ion battery development, Microvast is recognized globally as an industry leader for battery innovation and technology. Our comprehensive portfolio of battery solutions continues to advance innovation and deliver measurable value to our customers and their operations.

How does Microvast work?

Microvast is vertically integrated with absolute control from the R&D process to the manufacturing of our battery packs and energy storage systems (ESS), including core battery chemistry (cathode, anode, electrolyte, and separator).

What makes Microvast unique?

Founded in 2006 and headquartered in Houston, TX, Microvast is renowned for its cutting-edge cell technology and its vertical integration capabilities which extend from core battery chemistry (cathode, anode, electrolyte, and separator) to battery packs.

When will Microvast start manufacturing batteries in Tennessee?

On February 10, 2021, Tennessee officials and Microvast announced that the company will establish a new manufacturing facility in Clarksville to manufacture battery cells, modules and packs, with the production expected to begin in the summer of 2022.
