Become an innovator and leader of zero-carbon life and smart life. Become an innovative and leading integrated service provider of green energy solutions.

Is my roof suitable for solar panels?

If the sun sets in front of you, it's west-facing; if it sets to the left, it's north-facing; and if it sets on the opposite side of the property, it's east-facing. Here's how an installer will decide if your roof is suitable for solar panels, including assessing its direction, usable space, and loft.

Can a UK roof support solar panels?

As long as your roof is pitched, has enough unshaded space, and doesn't contain spray foam insulation underneath, it should be suitable for solar panels. The large majority of UK roofs are more than capable of supporting solar panels for as long as you need them to.

Should you install solar tiles on your roof?

"If you are removing or replacing the tiles you may choose to use solar tiles," says David. "The solar cells are built into the tiles or slates and mounted on the roof as if they were normal tiles or slates. Although not completely invisible these solar solutions can be much better aesthetically than the larger panels."

What are in-roof solar panels?

In-roof solar panels, or roof-integrated photovoltaics (RIPV), are fundamentally the same as traditional solar panels, except they are intended to be part of a property's roof (as opposed to just sitting on top of it).
