Getting a house battery had always been the plan, and was part of the reason why we had invested in such a large solar array. However finding a suitable battery, that would power us through the night, and help smooth out our pull from the grid to charge the car, had been fruitless - after a year of talking to multiple providers and looking at ...

Powerwall is a rechargeable home battery system that can be installed with or without solar. Powerwall 3 is designed for owners installing a new solar and storage system. Powerwall 3 features an integrated solar inverter for higher ...

In 2012, the first Model S rolled off the assembly line at our factory in Fremont, California. Today, we have the capacity to manufacture more than a million vehicles every year, in addition to energy products, battery cells and more.

In September 2016, a once in 50-year storm damaged critical infrastructure in South Australia, causing a state-wide blackout. In response, together with the South Australian Government and Neoen, Tesla installed the world's largest lithium-ion battery, the 100MW Hornsdale Power Reserve.
