

# Tesla solar panels are no longer generating electricity

Why is my solar system not producing power?

A larger buildup of snow may prevent your system from producing power until your roof is cleared. If your system receives intermittent sun exposure through the day, you may see drops in production on the solar generation graph in your Tesla app.

Are Tesla Solar panels clean?

Back to Top Tesla solar panels are designed to produce clean energy for decades. There are several best practices to get the most out of your solar system. You can maintain system performance by occasionally cleaning your panels to remove accumulated dust, pollen and leaves.

Does Tesla Solar inverter have a gateway?

Note: Tesla Solar Inverter does not have a Gateway. If you are experiencing issues with your Tesla Solar Inverter, proceed with troubleshooting your inverter. If you experience one of the following issues, this indicates that your solar system is not producing energy and your home is being powered by your local utility.

Why has Tesla cancelled solar projects?

Tesla has canceled solar projects across the US as it shuts down its solar operations in some markets. After years of Tesla's solar business slowing down, the division was finally gaining momentum over the last few quarters.

What happened to Tesla customers?

This includes hundreds of Tesla customers who had solar panels or solar roofs on order or even some projects that were already designed and permitted. The email from Tesla states that it is no longer servicing the areas where those customers are located.

Will my solar system work during a grid outage?

Without Powerwall, your solar system will not work during a grid outage. For safety, solar equipment is required to shut down during an outage if there is no home battery. By pairing your solar system with Powerwall, your system can maintain power and continue generating electricity during an outage.
