

Another competition-oriented driver is differentiation which ITM Power maintains through high product quality. Although combining efficiency with customer value is a demanding endeavor, we believe ...

About ITM Power. ITM Power is a company that focuses on the design and manufacture of electrolyzers in the energy sector. The company's main products are electrolyzers that use proton exchange membrane (PEM) technology to produce green hydrogen, a net-zero energy gas, from renewable electricity and water.

Backed by Ofgem's Network Innovation Competition, the £7 million project is led by Cadent in partnership with Northern Gas Networks, Keele University, the Health and Safety Executive (HSE) Science Division, integrated hydrogen energy systems manufacturer ITM-Power, and independent clean energy company Progressive Energy.

According to the "Hydrogen transportation | The key to unlocking the clean hydrogen economy" report from management consultancy, Roland Berger, most hydrogen produced in Europe is done so on-site owing to cost and logistics reasons. If sufficient amounts of clean hydrogen cannot be produced onsite - or if production costs are great than 4 EURO per kg - it claims that ...
